AEROSTAR ENGINE COWL ANTI-CHAFING LINER

Marsh Brothers Aerostar Engine Cowl Anti-Chafing Liner kit (Chafe Protection) provides protection of the interior surface of the engine cowl where the engine airframe seals contact with the upper engine cowl assembly.

By providing a tough abrasion resistant surface made from Marsh Brothers proprietary material AeroLas-White, wear on the aluminum upper engine cowl is eliminated.

Unlike most other chafe protection material available our anti-chafing liners do not have an adhesive backing. Instead, they are bonded in place using 3M DP420 two-part epoxy (not included in the kit). This results in a significantly stronger bond P/N 05-27284 **\$119.00**

SILICONE BAFFLE

Fiberglass reinforced (VISR) silicone engine baffle seal exceeds the neoprene fiberglass fabric seals in durability and flexibility over its entire operating heat range of -80°F to +425°F. VSR material does not have fiberglass reinforcement.

Model No.	Dimensions	Description	Part No.	Price
VISR3	1/8" x 3" x 9'	Red and Orange	13-18527	\$87.75
VISR3	1/8" x 3" x 9'	Blue	13-18529	\$86.75
VSR3640	1/8" x 36" x 40"	Red and Orange	13-18532	\$68.75
VSR4	1/8" x 4" x 9'	Red and Orange	13-18533	\$62.75

FIBERGLASS CLOTH BAFFLE MATERIAL

The same material used by several OEM aircraft manufacturers. Neoprene coated fiberglass cloth is heat & flame resistant, self-extinguishing, ozone & weather resistant, & will not support combustion. Temperature range -40F to +200F. AMS3783.

- Black 3" x 9' Roll P/N 05-12642 **\$73.75**
- Black 36" x 36" Sheet P/N 05-12643 **\$335.00**

SILICONE CEMENT WITH CATALYST

This silicone cement is the same cement that is included with some of the chafe seals and is excellent for attachment of any silicone seal.

Note: GBSC-2 or GBSC-4 silicone cement to apply silicone seals requires silicone cement only for application. Storage & Shelf Life: • Best if refrigerated under 70° • 18 months shelf life when stored properly • Easier to fill 2.5 oz. P/N 05-13310 **\$57.75**
